

CE II 2G c T6

High pressure paint spray gun HP 50

The gun is totally in stainless steel, compatible with all traffic paint. Without atomizing air

Connections:

- drive air inlet (opening) 1/4"
- drive air inlet (closing) 1/4"
- material inlet 3/8"
- Ø passage of paint 11 mm

Special material nozzle in tungsten carbide: Ø 3,2 mm

External nozzles: a wide choice of tips, flat or reversible, in tungsten carbide to meet all your needs in performance and width of lines.

The choice of external nozzle will depend on the desired work, combining the diameter and the spray angle of the tip (contact us).

This gun has a pneumatic closing system with rapid escapement to assure a very fast closing. A spring allows safety with a mechanical closing.

For large widths it is possible to mount an adjustable ramp for a line up to 60 cm.

A bigger width is possible on request. (Option)

Dimension: 170 x 100 mm

Weight: 1,3 kg

Advice:

- for the paint using only a hose that can withstand a working pressure of 300 bar
- using a constant drive air pressure at least 5 bars (72 psi)
